

A Observed state correction

yellow glass cup

ROBOT PLACEMENT

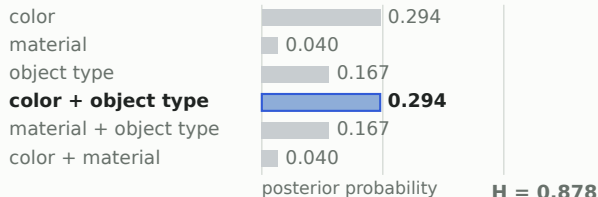

HUMAN CORRECTION

B Correction remains ambiguous

Several reward hypotheses predict this correction.

C Entropy-gated clarification

$H = 0.878 \geq \tau = 0.55$, so the robot asks.

Which features
mattered?

HUMAN ANSWER

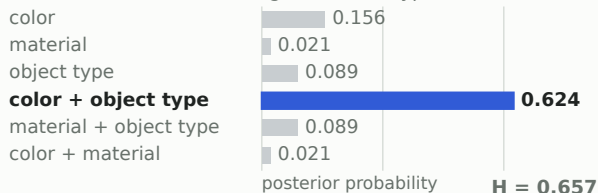

color

object type

answer likelihood = 0.8

D Belief after clarification

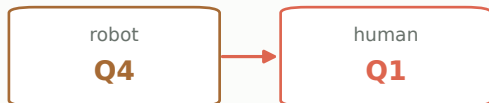

The answer favors the designated true hypothesis.

E Consequence on the next object

Same trace, next object: red glass cup

CORRECTION ONLY

× another correction

WITH CLARIFICATION

✓ accepted without correction
